TS3 Series

2" to 48" Forged

ANSI Class 150/300/600

900/1500/2500

3-Piece FORGED SOFT Seated

A-T Controls has been providing automated valve solutions for process industries since 1994. We have a 122,000 sq. ft. facility in Cincinnati, Ohio and a 85,000 sq. ft. facility in Houston, Texas. With strong engineering and application expertise, and an unparalleled inventory, A-T is ready to provide the highest quality quarter-turn valve packages from 1/4" to 48" in multiple end connections and port configurations.

TRUNNION Mounted Ball Valve

Principle Features

SOFT SEAT

SPE - PRESSURE AT THE SEAT UPSTREAM

SPE - PRESSURE AT THE SEAT DOWNSTREAM
(PRESSURE SELF-RELIEVING)

SINGLE PISTON Effect (SPE)/Self-Relieving Seats

Standard seat design is SPE seat or self-relieving seat with a soft seat insert. Under normal working conditions, the resultant pressure force pushes the seat against the ball to ensure a tight seal.

When the trapped pressure inside the body cavity is building up, it will push the seat away and relieve the pressure into the pipeline.

Double Block & Bleed

When pressure is applied to both closures, each seat will be forced against the ball, creating a double block. The vent in the main body can then be used to vent out the center cavity.

PRINCIPLE FEATURES

TRUNNION Mounted Ball Valve

SOFT SEAT

DOUBLE PISTON Effect

(DPE)/Double Isolation Block and Bleed

The DPE seat is an optional feature. The seat design comprises of a unique seal design that allows the seat to seal in both directions with the pressure either acting from the upstream or downstream of the seat.

When the pressure is applied from the upstream, the DPE seat works just like the SPE seat design.

When the pressure is acting from the downstream or body cavity, the floating seal design allows the downstream pressure to push the seat against the ball.

Note that the DPE seat configuration does not have self-relieving capability, and it requires a pressure relief valve to be installed in order to avoid the pressure build up inside the body cavity.

DPE - PRESSURE AT THE SEAT UPSTREAM

DPE - PRESSURE AT THE SEAT DOWNSTREAM

SOFT SEAT

Valve Features

Seat/Ball Sealing

To reduce the operating torque, the seat is designed with a pressure assisted sealing mechanism coupled with seat springs to ensure a tight seal under very low differential pressure conditions.

The seat insert is made from a thermoplastic material and can be offered with a variety of materials for specific applications. Single Piston/SPE is standard. Double Piston/DPE is optional.

Seat/Body Sealing

Fire-safe seat design is a standard feature. The seat/body seal design includes a combination of soft seal and graphite seal.

Emergency Seat Sealant Injection

Under normal operating conditions, A-T trunnion valves do not require sealants or lubricants. In the unlikely event that the seat gets damaged, an emergency shutoff may be achieved with a sealant injected into the seat sealing area.

SEALANT INJECTION FOR THE SEAT

- Requires a check valve
- Not available on smaller sizes

SOFT SEAT

Valve Features

Emergency Stem Sealing & Sealant Injection

Standard stem seal configuration consists of double O-Rings and a graphite seal ring. In the unlikely event that the soft seals get damaged, the seal can be restored by injecting valve sealant into the sealing area through the sealant fitting.

Fire-safe Metal Sealing After Fire

If the soft seat insert gets damaged due to fire, the seat is designed with a secondary sealing mechanism that allows a metal-to-metal contact between the seat and ball. This secondary metal sealing is a standard feature for all A-T soft-seated trunnion mounted ball valves.

Anti-Static Device

Anti-static devices between

- Body and Stem
- Stem and Ball

Paint Specification

- Epoxy Coating (Black)
- Special paint available upon request

Additional Features

- Blowout Proof Stem
- ISO 5211 Actuator Mounting

Optional Features

- Regular Port
- Extended Bonnet
- Stem Extensions
- Pup Joints

End Connection Options

- Raised Face
- RTJ
- Butt Weld

3-PIECE FORGED 2"-24" Class 900/1500 2"-12" Class 2500

SERIES TSW - Welded Body Trunnion Mounted Ball Valves

Standard Design Features:

- Seamless, fully welded forged body design
- Zero leak path at the body joint
- -50F Low temperature rated A350 LF2 body construction
- Sizes 2" thru 36"
- ANSI Pressure Class ranges from 150-600
- Anti-blowout stem design
- Stem sealant injection port
- Seat sealant injection port for both seats
- Replaceable stem seals
- Double Block-and-Bleed
- NACE MR0175
- ISO 5211 Mounting Pad
- Ready to be automated
- Epoxy exterior paint with polyurethane top finish

No.	PART NAME	MATERIAL
1	BODY	A350 LF2
2	BALL	A350 LF2 ENP
3	CLOSURE	A350 LF2
4	SEAT RING	A350 LF2
5	SEAT INSERT	RTFE/Nylon/Devlon/PEEK
6	O-RING	HNBR
7	FIRE-SAFE SEAL	Graphite
8	SPRING	Inconel@ X750
9	BODY COVER	A350 LF2
10	STEM	A350 LF2/4140 ENP
11	ADAPTER PLATE	A350 LF2
12	^a BEARING RETAINER	A350 LF2
13	ANTI-STATIC DEVICE	Stainless Steel
14	O-RING	HNBR
15	FIRE-SAFE SEAL	Graphite
16	THRUST WASHER	SS/TFE
17	BEARING	SS/TFE
18	CAP SCREW	A320 L7M
19	^b SEALANT FITTING	Stainless Steel
20	VENT VALVE	Stainless Steel
21	DRAIN VALVE	Stainless Steel

^a 6" and larger

^b Not available for 2"-4" Class 150/300

Fully Welded Body Design

SOFT SEAT

Design Features / Dimensions

SERIES TSW - Welded Body Trunnion Mounted Ball Valves

Optional Design Features:

- Stainless Steel Trims (Ball/Seats/Stem)
- DPE (Double Piston Effect) Seats
- High Temperature Trims, Seals, and Coatings
- RTJ Flange Ends
- Welded Ends/Butt-Weld Ends
- Welded Ends with Pup Pieces
- Extended Bonnet
- Custom Paint/Coating

Welded End / Butt-Weld Connection

Welded End Connection with Pup Pieces

Ring Joint RTJ End Connection

Notes:

1. Torques are tested by clean water at full differential pressure, based on carbon steel trim and standard seats.
2. Torques are based on SPE (Single Piston Effect) seats.
3. Contact factory for DPE (Double Piston Effect) seat option.
4. Torque values do not include safety factors.
5. For regular port, use dimensions of ball diameter.
6. Contact factory for other safety factors for different operating conditions.

Valve Size

0200	2"	1600	16"
0300	3"	1800	18"
0400	4"	2000	20"
0600	6"	2400	24"
0800	8"	3000	30"
1000	10"	3600	36"
1200	12"	4200	42"
1400	14"	4800	48"

Ball

S	316 SS
9	LF2 / ENP
7	A105N / ENP
2	Tungsten Carbide Coated 316SST
3	316SST / HCr
4	Chrome Carbide Coated 316SST
C	A182 F51 Duplex SST
H	4140/ENP
Y	F53 Forged Super Duplex

Stem

H	4140 / ENP
A	17-4 PH
B	XM-19
S	316SST
D	Inconel® 718
C	A182 F51 Duplex SST
9	A350 LF2 / ENP
7	A105N / ENP
E	A286
Y	F53 Forged Super Duplex

Seat

R1	RTFE (Single Piston)
R2	RTFE (Double Piston)
R3	RTFE (SPE & DPE)
V1	Devlon® (Single Piston)
V2	Devlon® (Double Piston)
V3	Devlon® (SPE & DPE)
Z1	PEEK (Single Piston)
Z2	PEEK (Double Piston)
Z3	PEEK (SPE & DPE)
N1	Nylon (Single Piston)
N2	Nylon (Double Piston)
3	316/Stellite®
2	Tungsten Carbide Coated 316SS
4	Chrome Carbide Coated 316SS

Packing

G	Graphite packing (standard)
P	TFE packing

Seals

E	EPDM
B	HNBR
N	HNBR AED
W	FKM
V	FKM AED
L	Low Temp FKM (-40°F to 400°F)
F	Low Temp FKM AED (-40°F to 400°F)
A	Aflas
X	Custom Material/Compound

Paint

X	Standard
S	Special (Customer Specified Coating)

Options

H	Wrench Operated to 4"
G	Gear Operator
L	Gear Operator w/ Locking Plate
X	Bare Stem
E	Extended Bonnet (specify extension length required)
B	Bypass Piping w/ 2-way valve
F	Factory Acceptance Test
C	Customer to specify custom testing
S	Spool Piece Mounting Kit for Automation
M	Channel Design Mounting Kit for Automation
A	API 641 Certified (Fugitive Emissions)
P	Purge Ports per Drawing
D	Fluoropolymer Coated Bolting
W	Welded Body Cover (TSW only)

(other options: consult factory)

FFTS37-F1XX-0600-7HR1GWX-L
6", 3-Piece, Full Port Trunnion Forged Ball Valve, ANSI Class 150 RFF, API 6D, API-607 Firesafe, A105N Body, A105N/3mil ENP Ball, 4140/1mil ENP Stem, RTFE (Single Piston) Seat, Graphite Packing/Seals, FKM Seals, NACE MR-0175, Gear Operator with Locking Plate

HOW TO ORDER

A-T Trunnion Mounted Ball Valves:

FFTS37-F1XX-0600-7HR1GWX-GBF

API 6D
